THE EVOLUTION OF MATTER1 The ultimate constitution of matter is a subject which has always exercised a powerful attraction upon the minds of men. Philosophical speculations of the essential unity of all matter and of the possibility of transforming the different kinds into one another have come down to us from the ancients. The modern science of Chemistry had its origin in the actual attempts at such transformation or transmutation made by the alchemists in the Middle Ages. These attempts centred around the transmutation of lead or other base metal into gold, and the alchemists believed that there existed, and spent their lives trying to discover, a philosopher s stone to which was ascribed the power to effect this transmutation in almost unlimited amount. The philosopher s stone was also credited with acting as a universal medicine, prolonging life and health indefinitely, or...
