## MEMBRANE TECHNOLOGIES FOR WATER TREATMENT: REMOVAL OF TOXIC TRACE ELEMENTS WITH EMPHASIS ON ARSENIC, FLUORIDE AND URANIUM (HARDBACK)

To download **Membrane Technologies for Water Treatment: Removal of Toxic Trace Elements with Emphasis on Arsenic, Fluoride and Uranium (Hardback)** eBook, make sure you access the web link under and save the document or gain access to other information which might be relevant to MEMBRANE TECHNOLOGIES FOR WATER TREATMENT: REMOVAL OF TOXIC TRACE ELEMENTS WITH EMPHASIS ON ARSENIC, FLUORIDE AND URANIUM (HARDBACK) book.

Taylor Francis Ltd, United Kingdom, 2016. Hardback. Book Condition: New. 246 x 174 mm. Language: English . Brand New Book. Focuses on the application of membrane technologies in removing toxic metals metalloids from water. Particular attention is devoted to the removal of arsenic, uranium, and fluoride. These compounds are all existing in the earth s crust at levels between two and five thousands micrograms per kg (parts per million) on average and these compounds can be considered highly toxic to humans, who are exposed to them primarily from air, food and water. In order to comply with the new maximum contaminant level, numerous studies have been undertaken to improve established treatments or to develop novel treatment technologies for removing toxic metals from contaminated surface and groundwater. Among the technologies available, applicable for water treatment, membrane technology has been identified as a promising technology to remove such toxic metals from water. The book describes both pressure driven (traditional processes, such as Nanofiltration, Reverse Osmosis, Ultrafiltration,etc) and more advanced membrane processes (such as forward osmosis, membrane distillation, and membrane bio-reactors) employed in the application of interest. Key aspect of this book is to provide information on both the basics of membrane technologies and on the results depending on the type of technology employed.
